

VARSITY SUMMER SCHOOL SWELLING

Attendance Is the Largest in History of Institution—Registration, 897.

80 MORE THAN LAST YEAR

STUDENTS FROM OVER TWENTY STATES ON THE ROLLS.

At the close of its first week of work, the university summer school finds itself not only the largest in the history of the institution, but also one of the largest summer schools in the United States. The registration to date is 897, an increase of more than eighty over that of last year. An influx of new arrivals is expected Monday morning, and before the end of the week the enrollment will in all probability be 1,000. Reference to catalogues from institutions throughout the country indicate that very few summer schools exceed this number of students.

Not only is practically every county of Utah represented in the school, but persons from more than a score of states are on the rolls, and in a few instances, notably Mexico, students have come from beyond the boundary lines of the United States. In the faculty and teaching force a wide distribution of territory is represented. Dr. Richard G. Boone of the department of education comes from California, where he has held a position as lecturer in education at the state university at Berkeley; Dr. William G. Anderson and his brother, H. S. Anderson, of the department of physical education come direct from Yale university, New Haven, Conn.; Jakob Bolin of the department of physical ed-

ucation is from New York City; Francis W. Kracher of the department of modern languages is a resident of Vienna, but has lately been established at the University of Chicago. The faculty comprises, in addition to these, fifty professors and instructors from the regular staff of the University of Utah; Dr. Joseph Peterson and Eugene Robert of the Brigham Young university; Miss Mary Parmelee of the Utah Agricultural college, H. Leo Marshall and Miss Anna Nebeker of the Latter-day Saints' university, and Miss Elsie Ward of the Salt Lake High school. Several principals of Utah high schools are assisting in the work of instruction.

Without Examination.
By special arrangement with the state board of education, teachers who have performed successful service in the public schools of the state may, by completing six hours of work in the summer school, secure a one-year's certificate which will permit them to teach in the public schools without examination. Graduates from the four-year course of accredited high schools of Utah may have advantage of the same privilege. State Superintendent Nelson has been at the university during part of the past week giving instruction and advice to teachers under his supervision. Mr. Nelson is authority for the fact that the summer school is proving an eminent factor in the success of the teaching in Utah public schools.

With a view to making the work of the summer school thorough and intensive, the committee in charge has decreased the amount of credit which students may secure by one season's study. Heretofore students have been permitted to carry work representing eight units of credit; this year the number of units has been decreased to six. This amount of work represents ten class recitations per week, and practically forty hours of preparation work. Under specified conditions students are permitted to register for more work than this.

The departments of instruction are practically as numerous and as various as those of the regular winter session of the university. Professional and cultural courses are being given and largely patronized. Prominent among the former is the department

of education, to which school teachers are especially attracted. The announcement of Dr. Boone's name has proved an important drawing card for this department, as he is regarded as one of the strongest men in that line of work in the United States. Dr. Boone was formerly president of the Michigan normal school, and at present is editor of the magazine "Education," published in Boston.

Proves More Popular.
The school of physical education is proving even more popular than in previous years, more than 125 students giving practically all of their time to this branch of work. Dr. William G. Anderson, director of physical education in Yale university, is in charge of this department. His associate is Jakob Bolin of New York, former dean of the Chautauqua School of Physical Education. Both of these men have national reputations in their line of work, and assisted by a corps of efficient instructors, they are giving to the Utah institution a course of instruction which is recognized as inferior to none throughout the country.

Extensive courses in the natural and physical sciences are being conducted, to which all the facilities of the university are available, and courses more strictly of a cultural nature have attracted a large percentage of the student population. On Mondays and Thursdays the students meet together in general assembly, for which occasions special lectures and musical programs are provided. Tomorrow the men and the women will assemble in segregated divisions, and subjects appropriate to each section will be discussed by experts. On Thursday from 12 to 1 a musicale will be given under the direction of Professor Squire Coop. Students and faculty will join in an excursion to Saltair Friday afternoon and evening.

HIGHLAND PARK IS WELL TRANSFORMED

Nine Hundred Acres of Bench Land Made Into Residence Parks.

Since the work began upon the improvements in Highland park it has been continued just as fast as conditions would permit and the result of this work has been a complete transformation of 900 acres of fine bench land into one of the finest residence parks in all the west.

And the work has only fairly begun. The force now at work is to be enlarged immediately and further grading, paving, home-building and other construction work is to be pushed with vigor.

This week will see the completion of the water system. The mains are now being laid in Highland Park proper and water will be turned into the pipes within a few days. As soon as water is available, the work of laying the twenty miles of cement sidewalks will begin. This will be followed by curbing of the streets in a large section of the tract. Grading in the eastern end of the park, and in the new addition, "B," will be going on all at the same time.

This activity means much to the entire southeast section. It means that Highland Park will be occupied by residences immediately, and that the building of homes will be rushed by those who have purchased lots, as well as by the Kimball & Richards Building company which now has twelve homes under way. Several of these homes are practically completed, and will be occupied as soon as finished.

SEEKS UNION LABOR CLAUSE IN BUILDING

A movement has been started by the Building and Trades council to induce Utah chapter of the American Institute of Architects to hereafter include in every building contract let by any member of the association the clause "union labor to be used exclusively." It is reported that the architects favor the idea and that in the very near future the details of the proposed alliance will be perfected. It is pointed out that the new architects' chapter can be of great assistance to the cause of organized labor, and from reports that have been circulated it is understood that the makers of plans are willing, and even anxious, to assist in the movement.

MAKING WAY FOR CHURCH.

Palatial Residence Is Being Razed For Baptist Congregation.

Contractor Showell expects to complete the razing of the residence at the northeast corner of Second South and Fourth East streets, on which site the new Immanuel Baptist church will be erected, by Tuesday night, and on the following day plans to begin the excavating for which he also has the contract. About 3,500 cubic yards will be excavated, Showell hoping to complete the job within two or three weeks at the most. The residence being razed was a most palatial structure. It was built about 20 or more years ago by John T. Lowell, and a short time ago was purchased by Immanuel Baptist congregation. The interior decorations were especially elaborate, handsome and valuable oil paintings covering the walls, with expensive furnishings and unique arrangements.

LONGVIEW PARK ATTRACTS.

Many Lots Have Been Disposed of in New Addition.

A feature of the activity in Longview Park addition, the past week, was the large amount of inquiry for property by home-seekers. Mr. M. Long recently made arrangements for supplying money to all purchasers of lots in the addition, to enable them to erect homes, and the turning over of the homes to the ground owners on easy terms. The lots in the addition are being rapidly disposed of. All of the N. M. Long company salesmen have been bustling the past two weeks and have been successful in disposing of a goodly portion of the addition.

S.S.S. FOR SUMMER SKIN DISEASES

Smooth, healthy skins are a rarity in Summer. Most persons are annoyed with pimples, boils, rashes or eruptions, while others suffer more severely with Eczema, Acne, Tetter, Salt Rheum, or some kindred skin disease. All skin affections come from humors and acids in the circulation. The blood, as it circulates through the system, deposits these acids and humors in the sensitive membranous flesh which lies just beneath the outer skin or tissue covering the body. This acid matter causes inflammation and a discharge which breaks through the delicate cuticle, and skin diseases are the result. To cure any skin trouble the blood must be freed from all acids and humors, and for this purpose nothing equals S. S. S. This great blood purifier goes down into the circulation and completely removes every particle of impurity, enriches the blood and in this way permanently cures skin diseases. S. S. S. urea, because it purifies the blood and allows it to nourish, soothe, and soften the skin instead of irritating it with fiery acids and humors. Book on Skin Diseases and any medical advice free.

Honest Furniture is the text of our little talk today

And of course this subject embraces honest prices—We put furniture first for quality is of paramount interest—the furniture we sell must first pass the critical inspection of our buyers—must be good enough to satisfy their skilled judgment before it is brought into our store—then we know it's good enough for anyone. After we have satisfied ourselves that the quality is perfect, then we think about price—we put a fair increase over cost—an increase fair to us both and by our fair and careful pricing system every piece of furniture in our store is truly a bargain.

OUR CREDIT SYSTEM IS ATTRACTING THOUSANDS.

The fact that a young couple may secure the entire home furnishings here and pay a small amount each month helps many a worthy young man and woman into happy homes where otherwise the first cost of starting out in life would be prohibitive—The I X L way is the easy way.

ECONOMIZE -- CUT DOWN YOUR ICE BILL

Buy an I X L refrigerator and stop that constant drain on the household expense fund.

Our refrigerators are of the highest type of refrigerator construction—Perfectly insulated walls—well ventilated provision chambers—Perfectly drained and absolutely sanitary throughout—We quote two numbers today just to illustrate the I X L way of pricing.

You would readily pay \$3 to \$5 more for this large, roomy ice box refrigerator, thoroughly insulated, galvanized lining throughout, a handsomely finished oak case and a great value at the price—

\$12.50

The splendid apartment house refrigerator, as illustrated on the right, is a commodious, handsome solid oak box, enamel lined, thoroughly insulated and fitted with adjustable shelves. This would bring more money, but the I X L way of pricing makes it—

\$26.00

Our increasingly popular

Barber's Supply Dept.

Folks are rapidly learning that here we are offering the same qualities in all varieties of toilet waters, perfumes, facial creams, skin foods, toilet soaps, etc., as the druggists and at a half to two-thirds less in prices.

We are manufacturers—We make the goods, and can absolutely guarantee every article sold to be of just as high quality and of as pure ingredients as any similar product on the market.

Just a few I X L Specials. Read:

ORIENTAL MASSAGE CREAM—Same as Pompeian—We guarantee the quality to be equal if not better—and note the prices—

Eight ounce jar 35c Sixteen ounce jar 60c

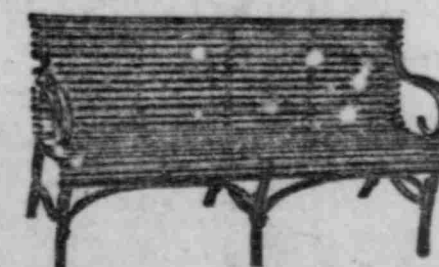

SHOE CLEANER for white canvas shoes—our regular 25c size bottle—Special 15c

Patent leather polish—our regular 10c size, 5c; regular 20c size, 15c.

Summer Furniture

For the porch, for the lawn, for the bungalow, we have the most extensive line of solidly constructed, thoroughly constructed, absolutely reliable furniture in the west.

Every style including willow rockers, settees, chairs, tables—Indian splint, the most durable furniture in the world, a revival of our grandfathers' ideas in style and construction and artistic in every line—other styles and varieties in abundance, with the following item quoted to give an idea of the fairness of our outdoor furniture prices.

Large, roomy, six-foot settee, beautifully finished, rigidly constructed. Special at.....
